# Senior Staff Engineer - Client Foundation (Cross platform IOS/Android)

## The Position

**Senior Staff Engineer - Cross Platform (IOS/Android) - Client Foundation**

Client Foundation is the group of mobile engineering teams responsible for the infrastructural layers of the Twitter for Android and Twitter for iOS Applications. Our work impacts hundreds of millions of users, which brings with it exciting product and technical challenges at that scale. We keep development lightweight and agile, make data driven decisions, and release with high quality and velocity. Come be a part of our team!

**Who we are:**

We are the collection of engineering teams working to double the engineering velocity of the Twitter Mobile Engineering organization. Our work is an integral part of Twitter's product vision and directly impacts the lives of our users and the success of our business. Our teams work on the infrastructural layers of the app - the core frameworks, abstractions, APIs, and tools that empower our feature engineers to do their best work. We solve complicated problems that are unique to both the scale of our customer base and the size of the engineering organization we support.

**A few things that set us apart:**

- **Strong customer focus - we partner closely with teams across the organization to ensure our platform meets their needs.**
- **We ship - we are big fans of the build-measure-learn cycle with a weekly release cadence.**
- **Team-centric development - We are highly collaborative in all aspects of the product development process, from ideation through scoping, technical design, implementation, code review, and beyond.**
- **We value software quality and technical growth - our code runs on millions of devices every single day, so it needs to be stable, performant, and trustworthy.**

**What you'll do:**

**The Senior Staff role is an IC leadership role, roughly equivalent to a “director level” engineer. In this role, you’ll be responsible for setting technical direction, shaping our engineering culture, identifying and adopting best practices, designing effective partnerships, mentoring and coaching our technical leads, and more. You will be a technical leader with substantial autonomy who will work to enable effective collaboration, high velocity execution, and technical excellence across the whole of the Client Foundation organization.**

**You will work at all layers of the stack and partner closely with technical leaders and senior management across all of engineering, data science, research, product, and design. You will help our codebase stay ahead of the curve of the constantly evolving development ecosystem and will ensure that feature development at Twitter is both fast and fun.**

**Within Client Foundation, you will be responsible for guiding the organization as we develop infrastructure and abstractions to help us double our engineering velocity. While you will certainly spend plenty of time contributing directly to the codebase, you will also focus on using your creativity, problem solving, and technical skills to empower the engineers around you to do their best work.**

**Who you are:**

**You are an experienced senior IC engineering leader looking to make Twitter one of the best mobile experiences out there. You care about culture, collaboration, and partnership just as much as you care about coding, architecture, and technical design. You have a strong customer focus, you are comfortable with ambiguity, you can drive alignment, and you make thoughtful data driven decisions. You care deeply about quality, are energized by partnership and collaboration, and you strive to enable others around you to excel.**

#### **Requirements:**

- **Experience developing iOS AND/OR Android applications**
- **Experience in technical leadership roles**
- **Experience leading large geographically distributed teams**
- **BS or MS in Computer Science or equivalent work experience**

## **Qualifications**

#### **Who you are:**

**You are an experienced senior IC engineering leader looking to make Twitter one of the best mobile experiences out there. You care about culture, collaboration, and partnership just as much as you care about coding, architecture, and technical design. You have a strong customer focus, you are comfortable with ambiguity, you can drive alignment, and you make thoughtful data driven decisions. You care deeply about quality, are energized by partnership and collaboration, and you strive to enable others around you to excel.**

#### **Requirements:**

- **Experience developing iOS/Android applications**

### Personal information

First name (required)

Last name (required)

Email (required)

Phone number (required)

Country (required)

▼

Email confirm (required)

Have you previously worked/do you currently work for Twitter? (required)

Select 

If yes, please provide estimated dates you were employed and your Twitter email.

If you have a design portfolio, GitHub, and/or a personal website, please provide the

link (and passwords if needed).

Are you authorized to work in the country in which this job is offered? (required) ☐

Yes ☐ No

Will you now or in the future require Twitter's sponsorship to continue or extend your current work authorization status? (required) ☐ Yes ☐ No

If yes, what is your current immigration status and when does your current

status/work authorization expire?

\*Twitter does not accept any unsolicited resumes from recruiting agencies and will not pay fees associated with any such resumes. Agencies, please do not send resumes to any Twitter location, employee, or email address.\*

## Privacy and data

Twitter cares about your privacy and protecting your data. Please click the privacy policy link and acknowledge you have read and understood how Twitter treats your privacy and your data.

Privacy Policy - I have read and acknowledge Twitter's Applicant and Candidate Privacy Policy. (required)

[Read Twitter's Applicant and Candidate Privacy Policy.](https://careers.twitter.com/en/privacy.html)

(<https://careers.twitter.com/en/privacy.html>).

☐ Confirmed

Would you like to receive email communication from Twitter about career opportunities? You may unsubscribe at any time. (required) ☐ Yes ☐ No

Analytics - May we use personal data from your resume and application to analyze and improve the Twitter hiring experience? (required) ☐ Yes ☐ No

Applicant Data - You have a choice. Can we keep your personal data for both the job you are applying for and any other Twitter jobs that we feel you may be a match for?

If you choose yes we will retain your personal data for a period of twelve months to consider you for other job opportunities at Twitter. (required) ☐Yes☐No

## U.S. Equal Employment Opportunity information (Completion is voluntary)

At Twitter, we have a bold aspiration to reach every person on the planet. We believe that goal is more attainable with a team that understands and represents different cultures and backgrounds and we are committed to an inclusive and diverse Twitter. This is where you come in! Please take a few minutes to provide us with your information. You are not required to provide this information and you may select “Decline to Disclose”. Your decision to provide information (or not) will not affect your employment or opportunities at Twitter. Twitter is an equal opportunity employer. We do not discriminate based on race, color, ethnicity, ancestry, national origin, religion, sex, gender, gender identity, gender expression, sexual orientation, age, disability, veteran status, genetic information, marital status or any legally protected status. Pursuant to the San Francisco Fair Chance Ordinance, and other similar local laws, we will consider for employment qualified applicants with arrest and conviction records.
